Task 2. Essay

There have always been miscellaneous hurdles in people's communication, that are tough to overcome. To illustrate, people frequently do not convey their actual thoughts, and consequently, the acute problem of misunderstanding arises. From my perspective, there is not a noticeable difference between speaking and communicating in the real life and on stage.

With regard to the stage, performers' words do not necessarily mean the same that they are trying to convey, and it makes the drama more engrossing. Personally, I think that it is fairly similar to real-life communication as people cannot always be straightforward, because sometimes it might be inappropriate or even insulting. As a result, interacting with others is challenging yet exciting process since people act as psychologists on a daily basis, attempting to reveal messages and ideas of others.

To summarise, William Shakespeare once said: "The world is a stage", and we should not deny it. Many outstanding writers, who obviously were experts in people's relationships, emphasised their utmost complexity. By and large, it is vital that you do not take all phrases too seriously and try to explain people's underlying notions to yourself.

Subject: Reasons encouraging studying abroad

Introduction

The objective of this report is to scrutinise the results of the recently conducted web-based survey on education. Over 1000 students were questioned about things that motivate them to study in another country.

Educational issues

Enhancing language skills has a significant presence in the answers of both age groups. One in four Master Degree students chose this option, while slightly under one fifth (18%) of Bachelor Degree students consider it to be crucial. This phenomenon can be ascribed to the fact that younger students are always seeking ways to improve the language, whereas older respondents might already be proficient. In fact, nearly a half of Master Degree students are concerned with future career prospects. Apparently, not many Bachelor students might be thinking about their career path as less considerable ~~amount~~ number of younger students chose this option (34%).

Personal pursuits

Increased maturity and confidence constituted 21 per cent of Bachelor students' answers, while a striking mere 5% of Master students believe that it is vital. Perhaps it is due to the fact that Masters have a lot more experience and they have achieved personal integrity. As for the better understanding of cultural values and biases, it made up the same proportion (16%). Travelling opportunities appeal to 14% older students and to only 4% of Bachelors. Probably, younger students are intimidated by living in another country alone owing to their age.

Conclusion

Given these points, it is certain that there are various motives to study abroad emerging among students. Speculating about the future, as the new trend of international friendship and tolerance is advancing, more students will be willing to explore other cultures, as well as getting career and studying benefits.

TS 3: 10 + 15 + 14 + 9 + 8 + 2 = 58
