Task 1

- 1. C
- 2. E
- 3. B
- 4. D
- 5. A

10

Task 2

- 1. Do many people agree that robots can become sympathetic?
- 2. What are some negative traits of teaching mentioned in the text?
- 3. Can robots become teachers or doctors?
- 4. How can robots help teachers make their job easier?
- 5. What is Anthony Seldon's prediction of 2027 and what will teachers' ^{possible} role be at that time?

Task 3

You probably think robots can't possibly do all the jobs, right? Well, the news article "Robot teachers?" by Ian Wright may change your mind.

Of course, some jobs rely on humans in sympathy and creativity. Obviously, robots aren't good with that. But what robots are successful with is efficiency: they don't need to rest physically, nor mentally.

Robots aren't affected by any negative sides of difficult jobs, teaching for example. One of the British experts in education, Anthony Seldon, even predicts that later, robots will do the main job, while teachers will be more of an assistance.

Robots can also help close the gaps for

schools, which don't have enough teachers. and minimize the time teachers spend doing their jobs in general.

I honestly think that would be amazing. Teachers do so much work, while usually getting very little respect and it's only fair for them to get more rest.

Task 4.

I suddenly turned into a balloon, flying in the sky. This isn't what I wanted when I wished to "be free as a balloon"!

Now, you must be very confused... Trust me, I am as well! But, let me explain how all of this happened.

I woke up pretty early today, mostly because of my brother jumping on my bed, loudly singing "Happy birthday". Yep, today was my birthday! Which meant that my super-fun-and-awesome birthday is going to ~~happy today~~ party happens today.

I was extremely excited since I've planned this for four whole months and a half.

By the time I got dressed, I already got a gift, which was a new lego set that I wanted to buy for a while. It was from my brother, ~~who never left my room.~~ who, as you could tell by now, woke me up specifically to hand me

the gift.

Anyhow, when I got down to the kitchen so I could have breakfast, my aunt scared me by jumping out of the corner.

- Whoa, Kate! You scared me!

- That was the point. Happy birthday!

She handed me a box, covered in sprinkles. Of course, as curious as I am, I quickly opened the box. Inside there was a stuffed toy. A cute animal, though I couldn't really tell what it was...

I thanked her and then I heard my friends calling me to play with them outside. I agreed, completely forgetting that I wanted to have breakfast.

We played 'till dawn and it was really fun! Each of my friends gave me wonderful gifts. But then it became very dark outside, so I had to go back home. The lights in the house were turned off, when I flipped the switch, all of my family were standing right in front of me with a cake. It was a surprise party!

Me and my family partied for a while and then it was time to eat the cake. I blew the

Числовое 4

candles and made my wish: to be free as a balloon.

Suddenly, ~~the~~ the power went out. I asked my dad to ~~turn it~~ fix the lights, since he was the only one who knew how to do it. I recieved no answer.

Creepy.

I blinked a few times and tried to find him by touch. Strangely, there was no one beside me. There wasn't anyone in the room but me! I called out, but no one answered.

"If this is supposed to be a prank, it isn't funny! Come out guys, I'm actually spooked now."

No answer. I was scared out of my wits by then. Where did everybody go!?

Then, I heard birds. Did I get outside, somehow? I opened my eyes and then...

Well, you know the rest. It started raining, too. I tried stirring my eyes, but how could I when I was a balloon?

My eyes then opened again and I sprung out of bed. Phew, it was just a nightmare!

4.

Plan:

birthday wish? - to be free as a balloon
by my mom

end: it started raining (it was all a dream
and the rain was my (author's) dog licking my face)

descriptions: describe how ~~cool and~~ happy I was
bc its my bday or describe the decor

agree
