Task 2

~~Ian Wright discusses an essential issue of environmental pollution in his work "Zero-waste" grocery stores"~~

Ian Wright discusses an essential concept of "zero-waste" supermarkets which has its roots in Europe. His work "Zero-Waste" grocery stores", published in The News, is relatable to many countries.

The author is concerned about environmental pollution caused by plastic packages used in shops. He stumbles upon a zero-waste supermarket by chance and continues his investigation by meeting the founder of a similar store.

Therefore, he shares the information about the developpment of this eco-idea in the world. For instance, the EU banned single-use plastics and several American municipalities charged plastic packages with high fees.

Besides, Ian Wright describes an

alternative way of purchasing products offered by zero-waste markets. According to the text, it is mandatory to bring one's own bag and take the necessary quantity of desirable goods from self-service dispensers.

I believe, such approach allows to diminish water and soil contamination. In my opinion, the contribution of every single person is valuable as ~~our~~^{the} nature condition is constantly deteriorating due to the consumerism and thoughtless use of plastic.

Task 4

I suddenly turned into a book lying on the table in the university library. I realised I became a dictionary that I was reading only after I had failed to stand up and look around. The only thing I saw was the white ceiling before someone took me in his hands. It was my old friend Jake who was asking library visitors if they had seen me (obviously in my usual human form). Seemingly, his behaviour became extremely annoying, thus, I could not refrain from saying that he should ^{have} stopped acting like this. It was a crucial mistake. Jake started yelling and dropped me.

- Hey, this was so painful. I see how you treat your friends, - I said.

- Why is Olivia's book talking? Am I going nuts? - Jake asked.

- Listen, just take me away from this cold floor. Let's discuss everything in a less crowded place or others will definitely think you need to have your head examined.

So Jake ran to the empty classroom like a flash. I ^{was feeling} ~~felt~~ nauseous from such speed and even thought I would black out. When we finally reached our destination I told him what had happened to me in details. Surprisingly, I only remembered that

^{dictionary}
 I was reading before my enigmatic transformation. "That's suspicious," Jake mumbled. He took his phone out of the pocket and called someone. "I've just asked for help. Wait me here and don't go anywhere," he warned me and left the room. "As if I could," I gigled in my thoughts. After some time the exhaustion had its impact on me. I closed my eyes for a moment and woke up from somebody's laughter. I raised my head and saw Jake who was communicating with our groupmates. I looked at the screen of my laptop to check my appearance and shouted "I'm not a book anymore! It was a silly dream!" My friends looked so confused but I did not care. I was full of beans when I realised that I could move independently. There was only one strange thing. My dictionary disappeared.

$$18 + 25 + 6 + 45 = 94$$

The exhaustion ^{нервотик} had its impact on me.
 I closed my eyes for a moment and
 woke up from somebody's laughter.
 I raised my head and saw ~~my~~ Jake
 who was chatting with our groupmates.
 I looked ~~around~~ at the screen of my
 laptop to see my appearance, ~~and~~
~~"I'm not a book anymore!"~~ I shouted.
 Everyone ~~looked~~ was so confused after "~~I~~"
 I shouted "I'm not a book anymore."
~~"You've never been a book, you just~~
~~felt asleep~~ ^{Huh,} I was just a dream!"
 Mysteriously, ~~the~~ ^{my} dictionary disappeared.
